

THE CENTRAL WEST WORKPLACE SAFETY FORUM

'BETTER BUSINESS THROUGH A SAFER
AND MORE COMPLIANT WORKPLACE'

AT THE ORANGE EX-SERVICES, CORAL SEA ROOM. 23 | ANSON ST ORANGE NSW
19TH JUNE 2013

Midd-West Risk Management

Mid-West Risk Management and PRM Training are proud to present the Central West Workplace Safety Forum.

MWRM and PRM Training have observed a void in the Central West of NSW, for businesses of like and different operations to learn, be updated and share experiences with **the vision of creating a safe and compliant Workplace**. The objective for PRM Training and Mid-West is to gather businesses of varying size and levels of compliance, and engage with the Seminar presenters in the areas of WH&S compliance, Corporate Governance, Workplace Emergency Preparedness and Response, Business Continuity and brand protection with the assistance of a safety focused and engaged Workforce. An **important challenge for any business wishing to trade with Government is what Safety systems are required to facilitate that trade**. A guest speaker from the NSW State Government Department of Trade Regional Infrastructure will **inform as to what is required in this area**.

The organisers have identified some **local businesses** that are clearly champions of safety in the region, and will request their attendance to outline their achievements and **forward vision for safety and compliance**.

The Key note speaker for the day will be Melissa Doran from Norton Rose Law firm based in Sydney. Norton Rose is renowned for being at the forefront of WH&S law, and represent their clients in civil and criminal matters in this area. Their understanding of this legislation and its practical application arising from Case law will provide some fascinating insight.

ARE YOU A....

- Business owner Managers of Small to Medium Enterprise or Large Business
- Local Government Supervisors and Managers
- State Government Supervisors and Managers
- Health Safety and Environment committee member
